KEY POINT

HUSHBORE line introduces Ø80 head exchangeable anti-vibration boring bars

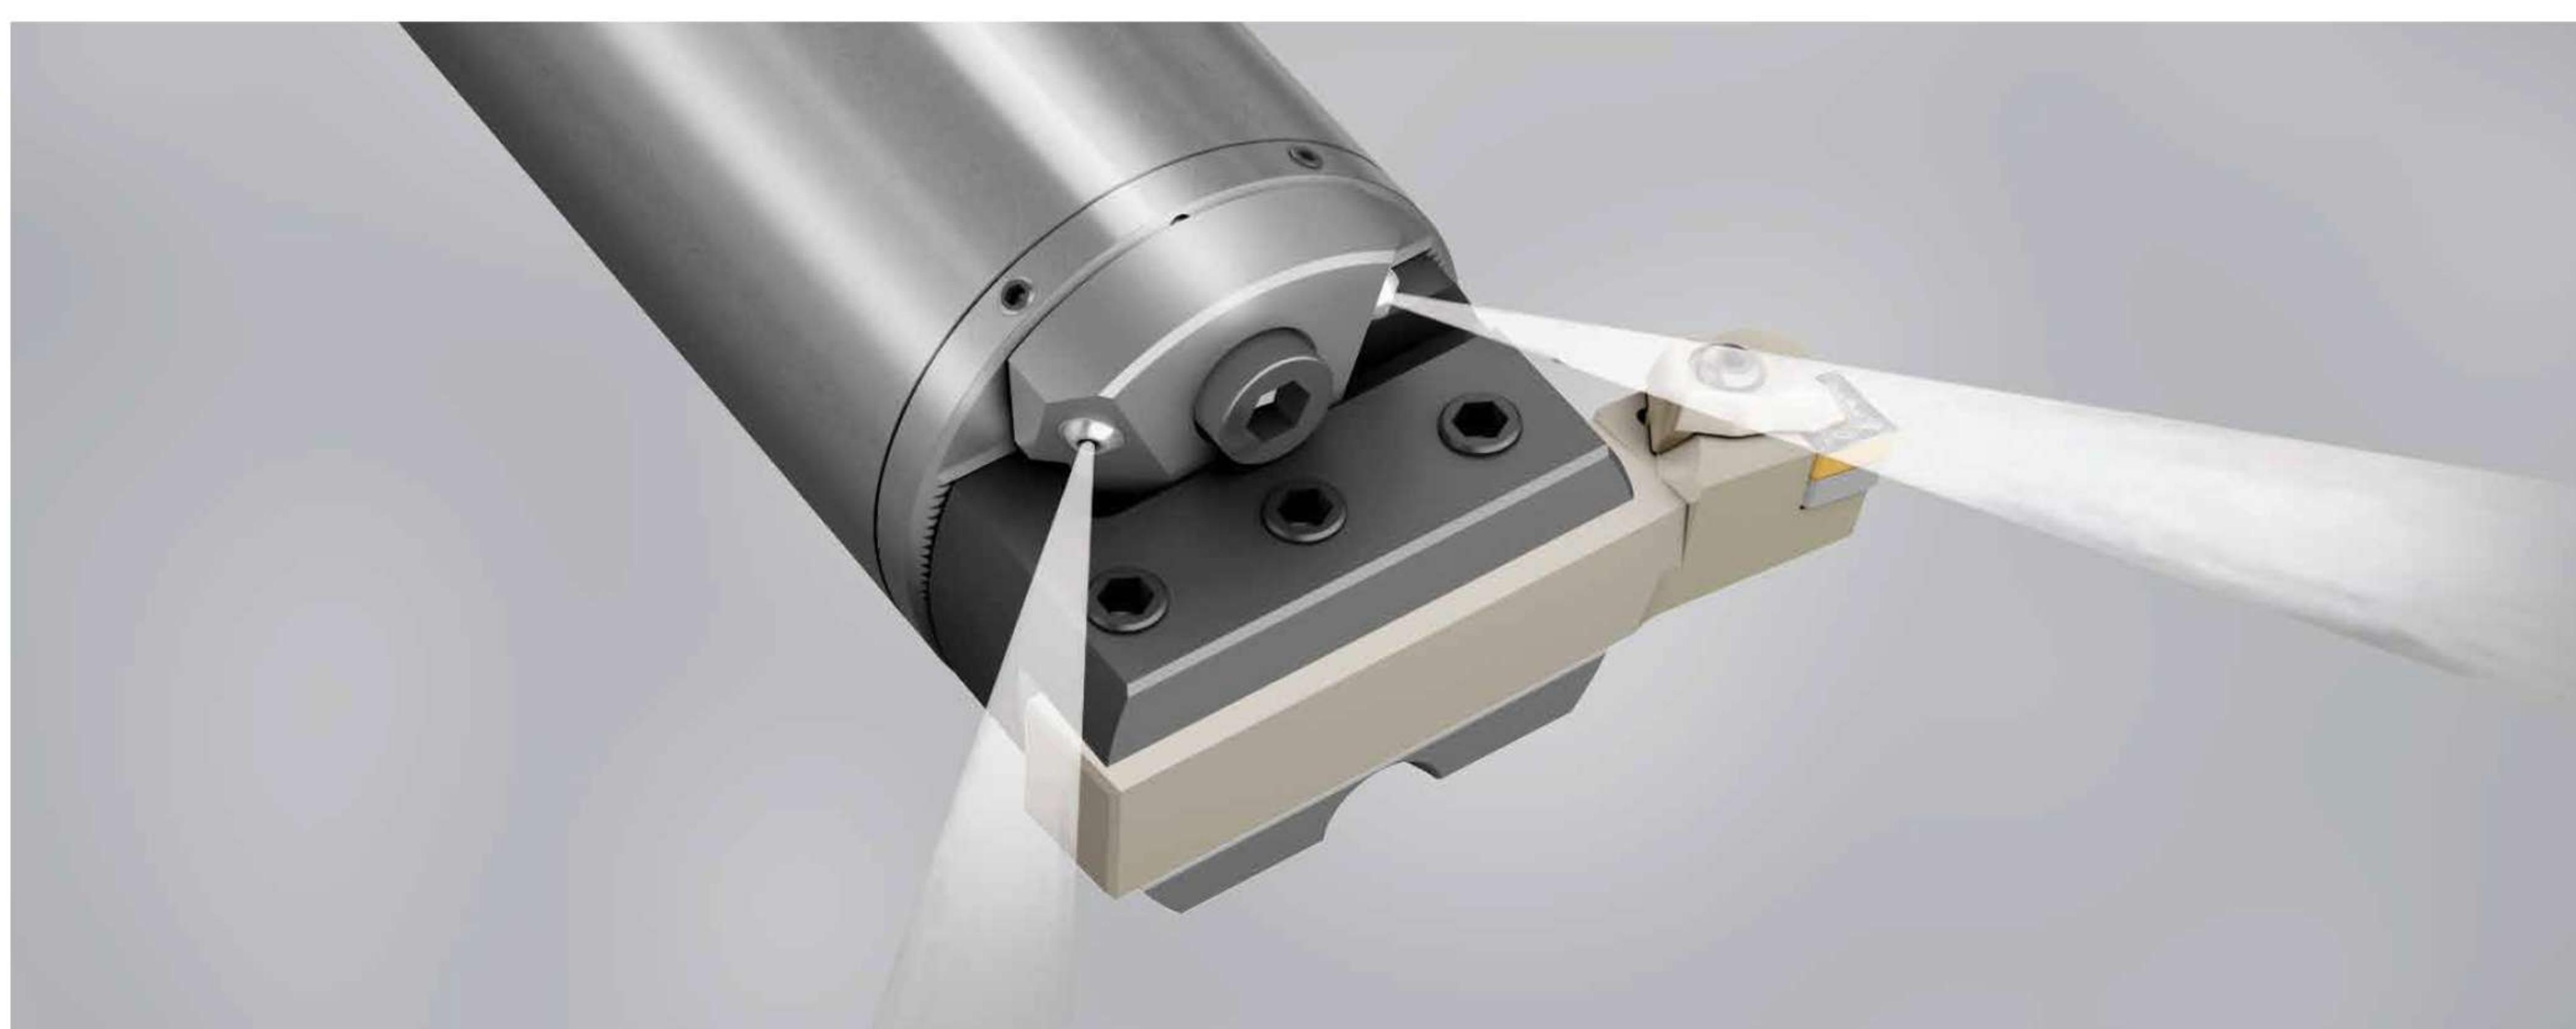

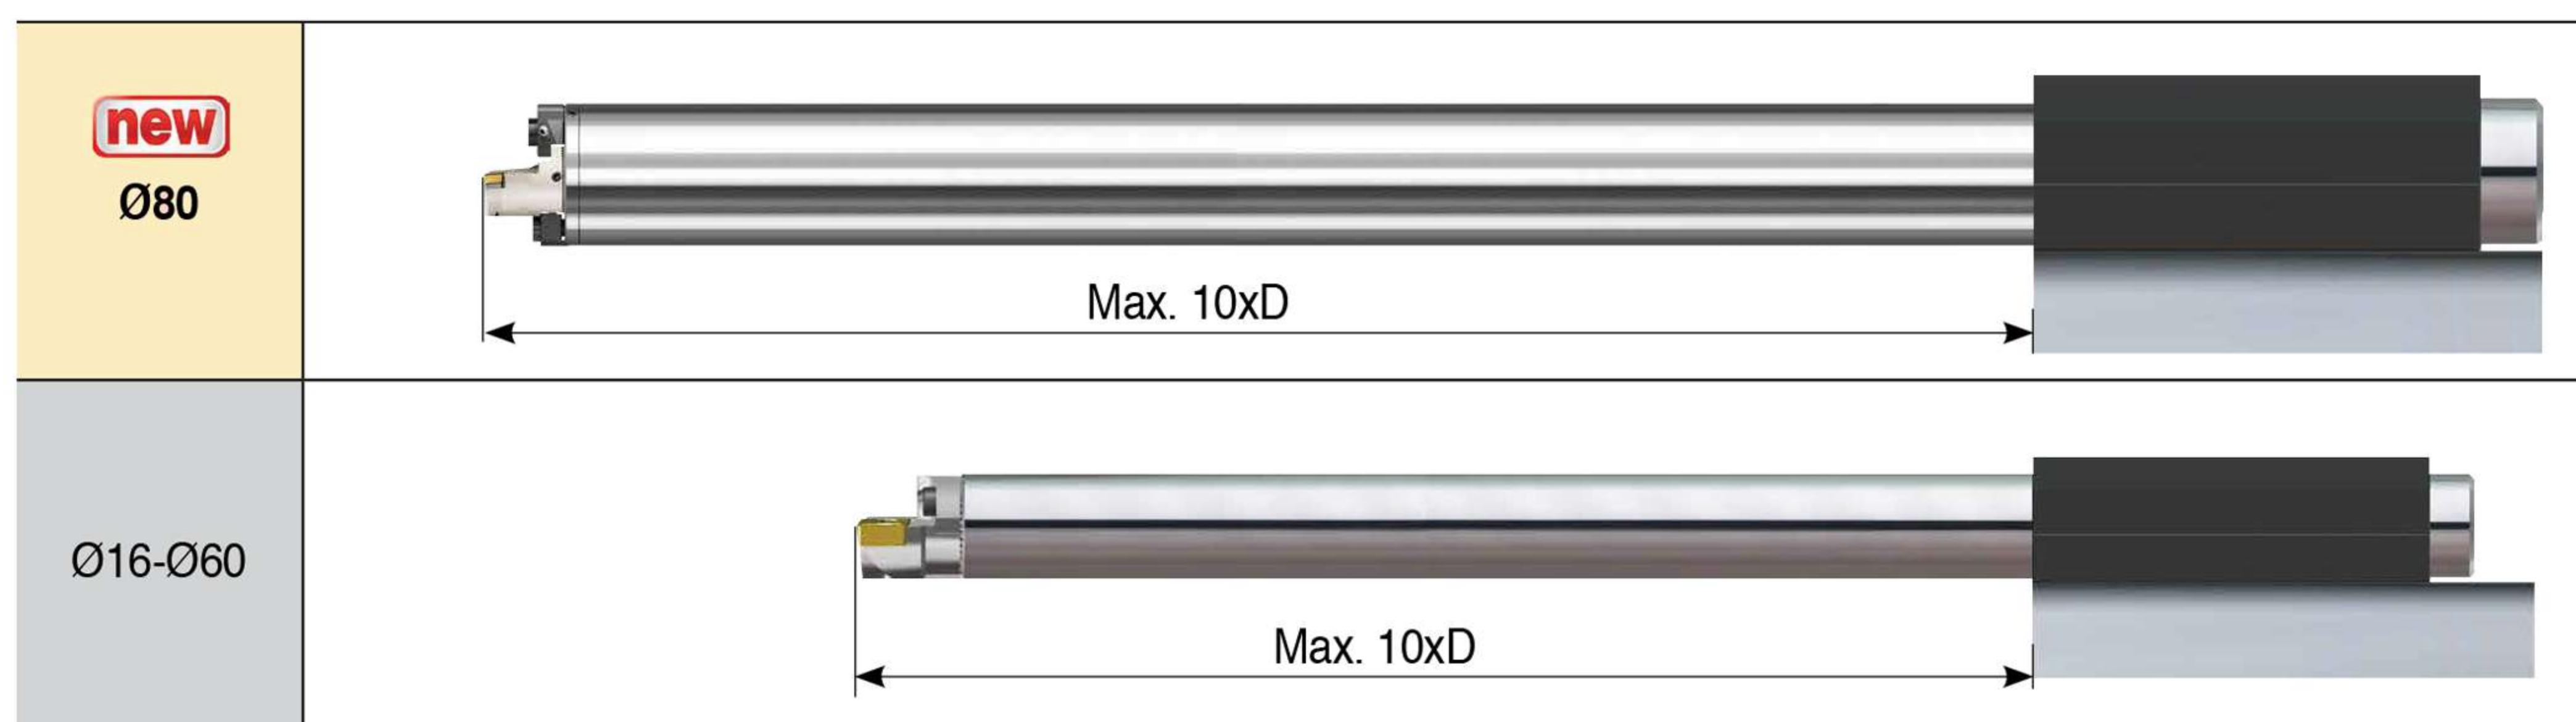

With a new Ø80 shank and a dedicated head introduced to the anti-vibration HUSH-BORE boring bar line specialized in deep internal machining, TaeguTec has expanded its reach in the deep internal machining market.

Available in two types: a modular head with standard inserts for machining various materials, and an adapter that can machine while fastened to a standard square holder, allowing for relatively large diameter internal machining.

Features

- Shanks include built-in vibration damping technology
 - Good surface roughness and improved tool life
- Stainless steel shank prevents corrosion
- Shank diameter: Ø80, length: 7xD, 10xD (available as standard items in 2 types)
- Available in various dedicated head types
- Dedicated Adapter use a 20x20 standard square holder
- Internal coolant type

HUSH-BORE Shank

NEW PRODUCT NEWS

Taegutec Turning Line

Head assembly instructions

① Loosen the screw.

② Slide the head into the slot.

③ Tighten the screw.

Square holder assembly instructions

① Remove the lower clamp.

② After sliding the adapter into the boring bar, tighten the clamp screw.

③ Slide the square holder into the adapter and tighten the adapter screw.

The logo for MEGA TECH METAL WORK CO., LTD. It features the word "MEGA" in large, bold, black letters with white outlines, partially overlapping a yellow triangle. Below "MEGA" is the word "TECH" in a smaller, bold, black font. At the bottom, the words "METAL WORK CO., LTD" are written in a smaller, bold, black font.

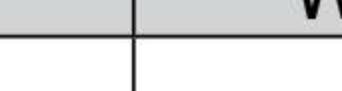

QH80-VH

Perpendicular adaptor for external square-shank tools

- Used with external 20x20 square holders
 - Since there is a deviation in the D_{MIN} value for each holder, it is recommended to use the boring head after checking for interference with the workpiece.
